**KAD Industrial Services Inc. (KAD)** has been providing products and solutions for various mining and industrial clients across the globe for 25+ years. We offer OEM and non-OEM pumps and pump parts for a wide-range of pump styles, as well as water treatment equipment, mining ventilation equipment, turrets and more! KAD currently possesses production facilities across Asia and North America to serve our Global market. KAD and our affiliate suppliers maintain ISO-9000 manufacturing facilities to ensure that all products are of the highest quality. We currently have 60,000 sq.ft. in warehouses in North America, with full service shop facilities and approximately 2-million dollars worth of inventory. We are committed to treating our customers with personal care and consideration of their individual needs. KAD will meet the requirements of any project with cost efficiency and high quality products and services. As our customer, you will receive our dependability and reliability, unsurpassed by any other supplier of our type in the world.

## Heavy-Duty Slurry Pumps

- External Impeller Adjustment
- Impeller Release Collar
- Heavy-Duty Bearing Frame
- Volute & Wear Plates
- Large Diameter Low Speed Impeller

## Non-OEM SRL, Denver & Warman Pumps

- 100% Guarantee Fit & Warrantee
- Enclosed Impeller Design
- Cartridge Bearing Assembly and Shaft
- Dynamic Seals

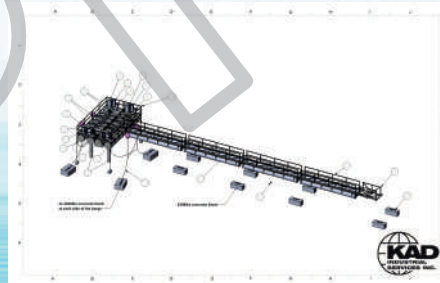

## Non-OEM Galigher, Sala & Warman Cantilever Slurry Pumps

- 100% Guarantee Fit & Warrantee
- Cartridge Bearing Assembly
- Advance Bearing Design

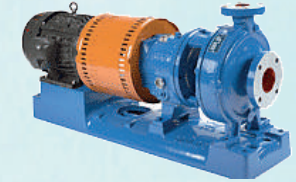

## Barge Pumping Systems

- Custom barges, floating platforms, and pontoons suitable for a variety of pump designs.
- New pump, or existing pumps can be used.
- Some additional barge options include: Monorail overhead crane, bridge crane, jib crane, working platform with toolbox, walkway, non-slip checkered deck plating, safety handrails, lighting, cable trays, winch/pully system and anchors.

## Goolds Pumps

- Water Pumps
- Process Pumps
- Vertical Turbines
- Fire Pumps

## Mining Ventilation

- Chinook Fans
- Silencer
- Inlet Bells
- Reducer
- Skid
- Duct (Rigid or Flexible)
- Screen

## Mine Dewatering Pump

- Horizontal Multi-Stage

## Turret

- Floating water intake device which solves the problem of drawing from shallow water with its patent-pending radial design
- One metre wide (max flow: 100 m3/hr), two metre wide (max flow: 500 m3/hr) and three metre wide (max flow: 1,000 m3/hr) turret options available.
- We will deliver an effective dewatering system, including:
  - Pump Solution: Land-based skid mounted, amphibious & submersible
  - Accessories: Priming System & Unit
  - Pipe: Adequately SDR rated poly, mining hose, etc.
  - Spools: Y Spool & Tri Spool to suit configuration
  - Float: Floats with SS316 or Galvanized fasteners
  - Reducers: Direct or External (Eccentric or Concentric) depending on size & application

## Parts

- We offer replacement parts for all of the equipment categories listed on our site in order to keep your existing equipment in working condition.
